

Secondary Breast Cancer KILLS

31 people a DAY*

(*in the UK alone as per statistics from Breast Cancer Now)

Over 11,500 women a year robbing people of their wives, mothers, daughters, friends, sisters and aunts
Men who die from breast cancer aren't even counted
Families are torn apart and left devastated

Under #BusyLivingWithMets we DEMAND change:

- Greater awareness of the disease
- Information on the risks & red flag symptoms
- Drug access to extend lives
- Lasting policy change
- Accountability from charities and drug companies

We want to stay #BusyLivingWithMets for many years, not with a 2-3 year death sentence

We need **ACTION** now
Join METUPUK to advocate to
change these issues
